

## In the Claims

This listing of claims will replace all prior versions and listings of claims in this application.

1 (currently amended). A Baculovirus comprising a vp39 fusion protein, wherein said fusion protein comprises a vp39 protein with an heterologous polypeptide fused to the C- or N- terminus of the vp39 protein is modified and wherein the said vp39 protein and wherein said fusion protein is expressed on the surface of the baculovirus capsid.

2 – 4 (cancelled).

5 (previously presented). The Baculovirus according to claim 1, wherein the modification allows nuclear or subcellular targeting.

6 (currently amended). A Baculovirus vector of which the genome has been modified such that ~~said baculovirus vector~~ expresses and displays a vp39 fusion protein, wherein the C- or N-terminus of the vp39 protein is modified and whrcin the fusion protein is expressed on the surface of the baculovirus capsid.

7 (cancelled).

8 (currently amended). The ~~Baculovirus vector~~ according to claim 6, wherein one or more heterologous genes are at least 10 kb long.

9 (currently amended). The ~~Baculovirus vector~~ according to claim 6, comprising a human gene.

10-19 (cancelled).
